Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of claims 1-4 in the reply filed on 5/2/2006 is acknowledged. The traversal is on the ground(s) that simultaneous examination of groups 1 and 2 would not present undue burden because both groups have subject matter classified in class 438. This is not found persuasive because the device invention of group 1 can be examined by searching only class 257, whereas group 2 requires a search of class 438.

The requirement is still deemed proper and is therefore made FINAL.

Furthermore, the applicant elected the specie of Figure 4, which corresponds to claims 1-4. It appears as though the election of claims 1-14 in the reply filed on 5/2/2006 is a typographical error. For the purposes of this action it is assumed that the election of the specie of Figure 4 corresponds to claims 1-4.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Ho et al (U.S. PG Pub #2004/0033689).

With respect to **claim 1**, Ho teaches a semiconductor device comprising a semiconductor substrate (Fig. 7a, 100); dummy patterns (Fig. 6, 102c) for a CMP method (Paragraph 2) formed in a uniform pattern over the semiconductor substrate; and marking patterns (Figs. 6 and 7, 102a) that are formed over the semiconductor substrate to correspond to predetermined groups of the dummy patterns.

With respect to **claim 2**, Ho teaches that the marking patterns have a different shape from the dummy patterns (Fig. 6, marking pattern 102a is square and dummy patterns 102c are rectangular).

With respect to **claim 3**, Ho teaches that the marking patterns 102a have a different size from the dummy patterns 102c.

With respect to **claim 4**, Ho teaches that the marking patterns are smaller than the dummy patterns (Figs. 6 and 7).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ben P. Sandvik whose telephone number is (571) 272-8446. The examiner can normally be reached on Mon-Fri.
